Work Experience

October 2022 - Present   Primuse - Singapore / Remote
Full-Stack Developer

- Built the whole web-application from scratch as a team of 2 developers
- Designed most of the front-end, to build an attractive result.
- Took part in discussing and designing the features of the application
- Technologies : React.js | Redux | TypeScript | Node.js | MongoDB | MUI | Axios

March 2022 - October 2022   Self-Employed - Remote
Software Engineer

Built my full stack web application Habits30 ; That has active users
www.habits30.net   View on Github

- Designed and built the whole project with many features such as a dashboard with graph statistics, onboarding, a demo account...
- Implemented session management and Google Sign In
- Wrote clean and testable code, with unit testing using Jest
- Technologies : React.js | Redux | TypeScript | Node.js | MongoDB | JasonWebToken | OAuth | Jest

January 2016 - March 2022   Poker Académie - Paris / Remote
Poker Coach

- I developed good communication skills to provide valuable feedback that leads to improvements
- I coached hundreds of students

Open Source
I am an active open source contributor, with multiple contributions in large open-source projects.

Voluntary Work
I volunteered for Chingu.io and worked as part of a team in an agile environment for 1 month to build a qualitative web project.
