SUMMARY

Full Stack Developer with 3 years of professional experience, focused on writing clean, testable code and building high-quality and responsive web applications.
Proficient in a variety of modern technologies, primarily centered around React.
Also develop personal projects with active users, showcased on my portfolio.

PROFESSIONAL EXPERIENCE

Digirise - Full Stack Developer (Tokyo, remote) / Contract work   **September 2024 - Present**
- Lead a team as frontend-lead to build an AI Chat application from scratch as a Next.js project.
- Taught junior engineers best practices and workflow to accelerate their learning.
- Designed and built the component based UI of the project using TailwindCSS.
- Implemented Server-Side Rendering using Next.js to optimize SEO performance and initial page load speed, improving core web vitals by 25%

Dunksoft - Full Stack Developer (Tokyo, remote)   **June 2023 - Present**
- Proposed and developed new features (including an onboarding feature) successfully, which received very positive feedback from customers.
- Planned and implemented multiple UI and UX improvements that lead to a large increase in user retention.
- Refactored and modernized the full application from jQuery to React.

Primuse - Full Stack Developer (Singapore, remote)   **August 2022 - June 2023**
- Built a complete MERN web application from scratch, as a team of 2 engineers.
- Designed most of the front-end, resulting in a clean and modern UI.
- Refactored and optimized the application's RESTful API, resulting in a 30% decrease in load times.

Self employed - Software Engineer (Tokyo, remote)   **February 2022 - August 2022**
- Designed and built www.habits30.net , my own web application that has active users.
